Financing a $22,000 car over 60 months

What this loan costs, what it does to your month and your savings, what to watch, and what to ask before you sign.

Executive summary

What changes	Your monthly leftover goes from $1,300 to $925 after the payment.
ⓘ Main concern	In this illustrative scenario (no income for two months), with this loan your savings would run out in month 2, leaving a gap of up to about $3,625.
Worth exploring	36 months (same rate assumed): monthly payment about $597, finance charge about $1,998, savings after purchase about $2,000.

Financial impact

What this loan commits you to, and what it does to your month and your savings.

THE COMMITMENT

Monthly payment

$375.14

5.796% APR · 60 months

Total of payments

$22,508.29

All payments over the loan

Finance charge

Total paid through this deal

$3,008.29

The cost of borrowing

$26,508.29

Including your down payment

YOUR HOUSEHOLD

Left each month

$1,300.00 → **$924.86**

After expenses — new-car running costs not included

Savings

$6,000.00 → **$2,000.00**

After the down payment

ⓘ **Not included:** New-car running costs (insurance, fuel, maintenance) aren't included — add them for a fuller picture.

Principal concerns

ⓘ **Illustrative: no income for two months**

In this illustrative scenario (no income for two months), with this loan your savings would run out in month 2, leaving a gap of up to about $3,625.

ⓘ **Savings would cover less than one month**

After this purchase your savings would cover less than one month of essential costs.

Relevant alternatives

What-if calculations under stated assumptions — not offers or recommendations.

Lower monthly payment	**A 72-month term instead of 60** Payment −$55.36 · Finance charge +$516.25 Same rate assumed — ask the lender
Lower total borrowing cost	**A 36-month term instead of 60** Payment +$222.04 · Finance charge −$1,009.97 Same rate assumed — ask the lender
Rate sensitivity	Each percentage point of interest rate changes the finance charge on this loan by about $552 and the monthly payment by about $9.

Next actions

Questions to ask before you sign, and gaps you can fill for a fuller picture.

ASK THE LENDER

Lender's buy rate

Dealers can add to the rate the lender approved; knowing the buy rate shows how much of your rate is dealer markup and gives you something to negotiate.

Running costs not included

New-car running costs (insurance, fuel, maintenance) aren't included — add them for a fuller picture.

About this report

This analysis is arithmetic on the figures you provided and assumptions you can see. It is not a prediction and not financial advice.

Synthetic demo mode. Documents must be the bundled synthetic samples; your typed numbers stay on this server.

Labels: “You told us” = typed by you; “You confirmed” = you affirmed the value; “matched” = the value was found next to its label in your document; “Calculated” = DecisionTwin arithmetic (formula id shown); “Assumption” = a stated assumption. No value is described as independently checked.

The assumptions behind these figures are listed in Appendix F.

Appendix

Detailed tables, every statement with its sources, and technical identifiers.

F. Assumptions, unknowns and flags

Illustrative scenario chosen by DecisionTwin to show how your plan responds. It is not a forecast of what will happen to you.
a_illustrative_scenarios

Illustrative: any shortfall beyond your savings is shown as an unfunded gap; no interest or fees on that gap are assumed.
a_gap_no_interest

Illustrative: flexible spending was not provided, so these monthly paths are before discretionary spending.
a_scenario_before_discretionary

Illustrative: no unemployment benefits, severance or spending cuts are assumed during the months without income.
a_no_job_benefits

Term alternatives assume the lender would offer the same rate for a different term.
same_rate_assumed

Alternatives are what-if calculations under the stated assumptions, not predictions.
a_what_if

New-car running costs (insurance, fuel, maintenance) were not provided, so no extra running cost is added for the new car. If it replaces your current car, this assumes the new car costs the same to run as your

current one; otherwise monthly figures show new-car running costs not included.
a_no_running_costs

Not known

Lender's buy rate — ask the lender
Dealers can add to the rate the lender approved; knowing the buy rate shows how much of your rate is dealer markup and gives you something to negotiate.

---

72 months (same rate assumed): monthly payment about $320, finance charge about $3,525, savings after purchase about $2,000.

[Calculated · what-if alternative; Assumption same_rate_assumed] · cl_alt_alt_003

---

36 months (same rate assumed), +$500 down: monthly payment about $582, finance charge about $1,961, savings after purchase about $1,500.

[Calculated · what-if alternative; Assumption same_rate_assumed] · cl_alt_alt_004

48 months (same rate assumed), +$500 down: monthly payment about $447, finance charge about $2,450, savings after purchase about $1,500.

[Calculated · what-if alternative; Assumption same_rate_assumed] · cl_alt_alt_005

+$500 down: monthly payment about $366, finance charge about $2,946, savings after purchase about $1,500.

[Calculated · what-if alternative] · cl_alt_alt_006

Each percentage point of interest rate changes the finance charge on this loan by about $552 and the monthly payment by about $9.

[Calculated · Finance charge] · cl_rate_1pt

These alternatives are what-if calculations under the stated assumptions, not predictions or advice.

[Assumption a_what_if] · cl_alt_note

Ask the dealer what rate the lender actually approved (the buy rate).
